DAYMARK AZURE BACKUP WORKSHOP

Protecting data in the Azure cloud is a top priority – and the responsibility of – enterprises. Azure provides a secure infrastructure, but you are responsible for ensuring protection of your data – not Microsoft. Going it alone can create unnecessary risks, costs and delays. Daymark's Azure Backup Workshop leverages our extensive expertise and proven best practices in backup & recovery to ensure your data is protected and available.

ARE YOU READY FOR RELIABLE DATA PROTECTION IN THE CLOUD?

Going it alone can create unnecessary risks, costs and delays. **Daymark's Azure Backup Workshop** leverages our extensive expertise and proven best practices in backup & recovery to ensure your data is protected and available.

Microsoft Azure

ABOUT THE WORKSHOP

The Daymark Azure Backup Workshop is a two-day onsite workshop at your location. Daymark Cloud Architects will discuss your current backup environment and processes. This includes protecting data on virtual machines, on-premises servers, virtualized workloads, applications and more. We will then make recommendations on how to ensure your business-critical data is accessible, compliant, and quickly recoverable.

DAY ONE

Daymark Cloud Architects will cover:

- Azure backup fundamentals
- Existing and future backup requirements
- Key data protection considerations
- Pros and cons of multiple solutions
- Impact on Disaster Recovery

DAY TWO

Daymark Cloud Architects will demonstrate how to:

- Create a Recovery Services vault
- Define and apply backup policies to multiple VMs
- Backup multiple Azure VMs using Recovery Vaults
- Restore a disk and create a recovered VM
- Restore files to a Virtual Machine in Azure
- Back up an on-premises Windows Server to Azure
- Recover files from Azure to an on-premises Windows Server

WORKSHOP HIGHLIGHTS

Azure Backup Workshop Highlights

- Highly-optimized, cost-effective data protection in Azure
- Comprehensive suite of data protection and disaster recovery options
- Strong partnerships with industry-leading data protection technologies
- Flexibility to develop solutions to meet organizational strategies

WE HELP YOU NAVIGATE INFORMATION TECHNOLOGY

KEY REASONS TO WORK WITH DAYMARK

- Team of certified Microsoft Cloud Architects

- Microsoft Gold Competency for Cloud Platform and Cloud Productivity

- Additional competency in Datacenter, Mobility and End-user Computing

- Multiple complex deployments and migrations to Azure

- Member of the Microsoft Managed Partner Program

- 24/7 locally staffed Network Operations Center

- Premier status and access to Microsoft Engineering support

PARTNERSHIP

The Microsoft Azure cloud, together with many of the industry's top backup/replication solutions, provides Daymark clients with highly optimized, efficient, and cost-effective data protection in the cloud. By leveraging our deep expertise in Microsoft Azure, together with our long history in data protection, enterprises consistently reduce their maintenance and management costs year-over-year while improving data management capabilities, cost efficiencies, and enterprise level data protection. Microsoft works very closely with Daymark to ensure that together we deliver outstanding solutions and services to our customers. We can also provide additional support to customers with executive briefings and technical training at the Microsoft Technology Center in Burlington, MA or at our corporate headquarters in Lexington.

Are you ready for reliable data protection in the cloud? Our experts look forward to discussing your needs and helping you formulate a customized data protection plan. Contact us today!
