Do More, Spend Less with Microsoft Azure

Grow your business, not your budget, with flexible cloud solutions that save you money

Microsoft

Microsoft Azure

Overview

With the fast pace of innovation constantly accelerating, it's becoming increasingly expensive to keep investing in the latest and greatest IT solutions. At the same time, relying on older solutions while your competitors invest in new ones gives them a leg up on you to anticipate, manage, and respond more quickly to change.

By turning to Daymark's Managed Service offering of Microsoft Azure in the cloud, you can keep your competitive edge without expanding your budget. Azure helps you bring products and services to market quickly. You can instantly scale globally, with everything needed to support worldwide business growth. You can run your operations more cost-effectively, paying only for what you use as opposed to for what you don't. You can also free up your budget for other business needs by eliminating the cost of new hardware. With Daymark you can gain enterprise-level security with the same data protection and datacenter security that many of the world's largest organizations enjoy today.

Break boundaries without breaking your bank	Don't let your business miss a beat	Boost your customer experience
You want to focus on running your business, not your infrastructure and the bottom line. With Daymark, you can build, deploy, and manage applications in the cloud without worrying about the cost of purchasing new server hardware. You can easily scale up or down as needed and gain peace of mind knowing you have the added protection of multiple data backups in Microsoft-managed datacenters.	Many businesses lose critical data because they don't have a reliable data backup solution. Daymark offers simple, reliable backup for your data and applications that's affordable because you pay only for the storage you use. There are no typical infrastructure costs or per-server or data transfer fees. Plus, your applications receive the same level of protection that Microsoft enterprise customers, including many of the world's largest financial institutions, receive.	Any business can host its own website, but is the risk of poor performance, security breaches, and skyrocketing costs worth the price? With Azure, you can quickly and easily host scalable websites in the cloud. Microsoft uses multiple datacenters around the world, helping provide you and your customers with a reliable, satisfying, and secure experience that enables you to deploy your applications close to your customers.

Azure Global Datacenters

Global datacenters ●
Global support ●
Local account teams 👤

24 x 7 x 365 support, over 1 billion customers, 20 million businesses, 90 markets worldwide, 280 years of combined industry experience in infrastructure, security, product development and global operations.

Daymark is a Microsoft Silver Cloud Partner, together we deliver outstanding solutions and services to our customers. In addition to design, deployment and on-going management of Azure, we can provide additional support to customers with proof of concepts, executive briefings and technical training at the Cambridge Microsoft Technology Center or at our corporate headquarters in Lexington, MA. Ask your Daymark or Microsoft account executive how we can assist your organization with Microsoft Cloud Solutions.
