

Daymark Infrastructure as a Service

Cloud the way you want it

Daymark offers an IaaS cloud environment highly customized to meet your needs. Start with a solid core of compute, storage, and state-of-the-art network resources, and then design your custom cloud with the exact components you need to make it your own. Built on state-of-the-art technology from Cisco, NetApp, VMware, Brocade and Dell.

IaaS Benefits

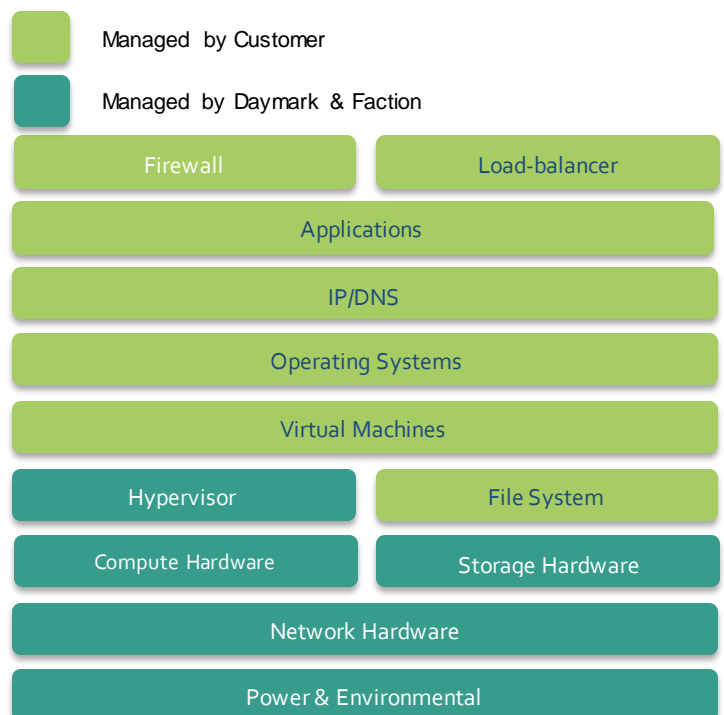

- Flexibility to choose type of cloud and risk profile
 - Public, private, hybrid cloud and disaster recovery solutions
 - Agnostic platform. No lock-in to any single vendor or technology
- Unparalleled access to the deepest layers of your infrastructure
- Dedicate management Console – not shared with anyone
- Security and compliance -Type II SSAE 16 SOC 1 & 2 & HIPAA compliant
- Dedicated resources - Superior performance is assured with dedicated compute, storage & network resources
 - Network Flexibility – Layer 2 Direct Connect allows you to bring your network “as-is”
 - 100% SLA money-back guarantee. You’d want that, right?

Daymark IaaS Powered by Faction:

Faction (formerly Peak), started in 2006 as an inspired, Cloud IAAS collective, populated by some of the most award-winning IT engineers and thought leaders in the cloud computing industry. Determined to revolutionize a smarter, uncompromised way for IT pros to reliably work in the cloud, Faction is gaining rapid momentum and attracting impressive numbers of progressive, forward-thinking customers and channel partners nationwide – all undeterred in their shared pursuit of extreme performance, deep control and broad customization.

The Daymark Difference

We take the complexity out of your IT infrastructure. Daymark architects, sells and implements data center infrastructure, data protection, virtualization, managed services and cloud services for businesses throughout New England. We provide deep technical knowledge, extensive experience and proven methodologies that help our clients make strategic decisions, streamline the acquisition process and successfully implement cost-effective data management infrastructure solutions.
