

Daymark Reporting as a Service

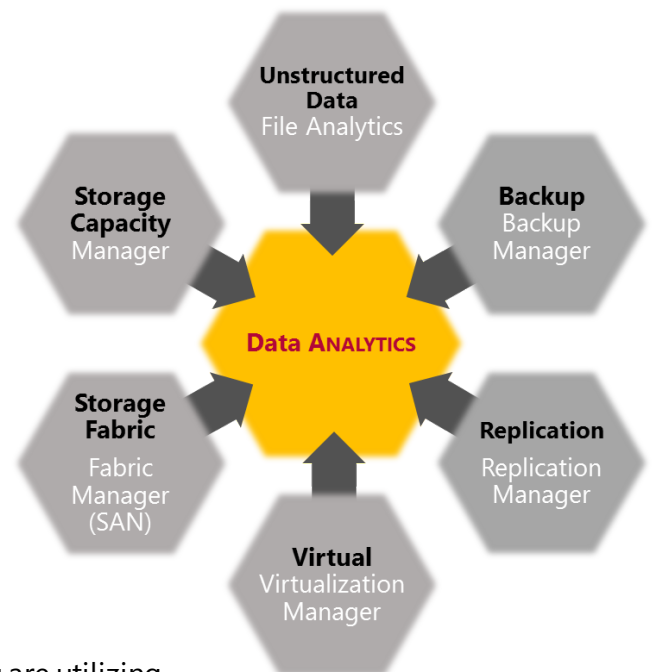

It is time to stop guessing and know.

Reporting-as-a-Service (RaaS) is gaining momentum by providing IT organizations with the analytics and visibility they need to better understand their heterogeneous storage, unstructured data, backup, SAN fabric and virtualized environment.

Daymark's Reporting-as-a-Service offering provides all-encompassing data analytics for your environment, so you can fully understand, manage and measure your IT infrastructure.

Benefits

- Agentless data collection
- Administrator and executive-level reports
- End-to-end visibility of technology stack
 - Physical
 - Virtual
 - SAN/NAS
 - Unstructured data
 - Data protection
- 24x7 access to web portal
- Automated reports
- Standard and customizable reports and dashboards
- Bi-annual health check
- Subscription basis for only the modules and capacities you are utilizing
- No additional hardware or software costs

Daymark's Reporting-as-a-Service tool set should not be confused with a monitoring tool. Monitoring implies real-time event notifications for specific assets and their health. Daymark provides automated, regularly scheduled reports that look at the overall state of the environment as opposed to a single IT asset's health at any given moment. Reporting as a Service is not an alerting or notifying tool. It is a data analytics tool.

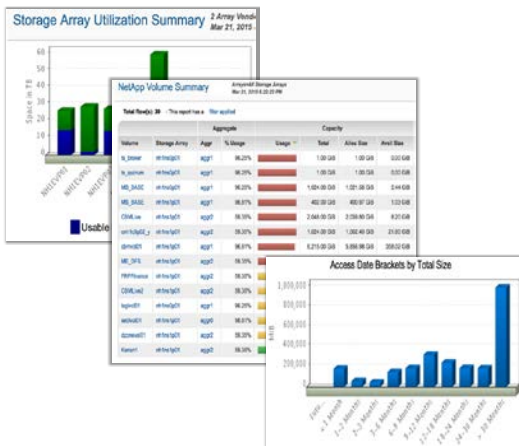

Signing Up is Easy - Assess, Report, Analyze!

30 Day Assessment

Executive Report of Findings

Ongoing Analytics

- Remote installation of agentless data collector
- Access to web portal
- Detailed "Executive Report" documenting the analysis, findings, and recommendations on appropriate actions
- Report will include tactical, unbiased recommendations spanning technologies and proposed solution designs, processes required, and implications for existing infrastructure
- Subscription basis for only modules & capacities you are utilizing
- Unlimited access to service desk, dedicated administration, custom report generation, and bi-annual health check
- 9-5, M-F email, phone, and ticket support
- Custom report and dashboard generation
