

# AZURE CLOUD SECURITY

## The Cloud Security Advantage

The need for a reliable and secure cloud environment has never been more critical for today's always on enterprises. IT leaders across all industries recognize they need to be vigilant against increasingly sophisticated threats. Daymark's Azure Cloud Security delivers the security your enterprise needs to keep applications and data safe.

## Azure Cloud Service Offerings

*New to Microsoft Azure?* Daymark has deep technical expertise in moving an organization's first workloads to the cloud and can help your team jumpstart the adoption of Microsoft Azure. As a Microsoft Tier 1 Cloud Service Provider, we offer design, deployment and ongoing management of Azure. We also offer **The Daymark Azure Everywhere Workshop** - a two-day onsite workshop at your location where Daymark cloud consultants will conduct a thorough assessment of your environment and make recommendations on workloads best suited for the Azure platform. Our team will then develop a Proof of Concept for one of your workloads optimized for Azure.

With a comprehensive understanding of Microsoft's Shared Responsibility Model, we implement security measures to ensure your applications and data are secure and compliant. If you prefer to leverage your on-premises resources, we can also help you to connect those to the public cloud while ensuring your data and applications are protected.

## Key Reasons to Work with Daymark

- 17+ years architecting and deploying enterprise data center solutions for demanding environments
- Microsoft Tier 1 Cloud Service Provider
- Microsoft Gold Cloud Platform certification
- 5 Microsoft silver competencies (including datacenter)
- Member of elite Microsoft Managed Partner Program
- 24/7 Network Operations Center

## Key Reasons to Work with Microsoft

- End-to-end compliance certifications including SSAE-16, HIPAA, ITAR, FFIEC, Sarbanes Oxley, ATF and PCI DSS
- Geographically dispersed data centers
- Seven-factor authentication and full N+1 redundancy
- Scalable backup hosted solutions that can restore individual files to complete enterprise IT restoration

By leveraging Daymark's expertise in hosted infrastructure, organizations consistently reduce their maintenance and management costs year-over-year while improving network capabilities, cost efficiencies, and enterprise-level data protection.

## Cloud Security with Daymark Partners

Daymark maintains strong partnerships with a range of independent software vendors to further augment Azure cloud security. We have extensive experience implementing these solutions to deliver a secure cloud to our customers.

**Check Point** - creates sophisticated and detailed logs on the malicious traffic trying to infiltrate your network.

**Cisco ASA** - offers a high-performance IPSec tunnel that works flawlessly in sync with Virtual Network Gateways in Azure. It also provides sophisticated logs of malicious traffic trying to break into those tunnels.

**F5** - offers sophisticated load balancing capabilities. F5 leads in its IPSec functionality, and its ability to firewall at the network level, application level, and DNS.

**Mimecast** - makes your email safer by protecting against the most sophisticated email attacks.

**Okta** - provides secure identity management with Single Sign-On, Multi-factor Authentication, Lifecycle Management (Provisioning), and more.

**Palo Alto** - delivers consistent, automated protection across multi-cloud deployments to deliver continuous security and compliance, prevent data loss and business disruption, and achieve zero-day prevention.
