

DAYMARK CMMC COMPLIANCE ASSIST SERVICES

Need help developing a framework for a Cybersecurity Maturity Model (CMMC) compliance program? Daymark's CMMC Compliance Assist Services are designed to provide your organization with the framework needed for developing a comprehensive compliance program. Daymark's CMMC Compliance Assist Services can be used in conjunction with our comprehensive GCC High migration services. We can help you migrate from Microsoft 365, Microsoft Exchange or Google with our proven 5-phase approach that ensures a smooth transition to Microsoft GCC High in 4-6 weeks.

PROFESSIONAL SERVICE ENGAGEMENT

Daymark's Compliance Assist Service is a professional service engagement offered together with our partner, Critical Prism Defense. **Critical Prism Defense** is a Microsoft partner with a long history of helping companies in the Defense, Aerospace, and Government space with custom services, comprehensive assessments, and recommendations, ensuring that systems and networks will be protected, staff will be trained, and all necessary government requirements will be met.

We will provide education and training on the 110 controls and 320 assessment objectives from NIST SP 800-171r2 that correlate to CMMC. The service includes assistance with development of evidence such as diagrams, inventories, and risk/security assessments. We will then guide you through the development of policies, procedures, scoping diagrams, a system security plan (SSP), and plan of actions & milestones (POA&M) using our provided format templates. Using Microsoft Purview, we will work with your team to review the shared responsibilities matrix and CMMC 2.0 Level 2 Microsoft 365 compliance templates. Based on these efforts, we will perform a self-assessment of your implementation and provide action items, staging assistance, and evidence preparation for your future CMMC assessment.

PROJECT DURATION: 4-6 WEEKS

This project is meant to serve as a framework and guidance for achieving CMMC 2.0 certification. Writing of actual policies, procedures, etc. is the responsibility of the customer.

PROJECT COST

Pricing starts at \$15,000 for organizations with 1-50 employees.

WE TAKE THE RISK AND COMPLEXITY OUT OF COMPLIANCE

Daymark is a Microsoft Licensing Partner for Microsoft 365 Government Community Cloud (GCC), GCC High and Azure Government. GCC and GCC High are secure platforms designed for U.S. federal, state, and local governments, as well as for organizations that deal with government data that falls under strict regulatory requirements. GCC High enables Defense Industrial Base (DIB) organizations to meet compliance requirements of CMMC 2.0 Level 2
