

MICROSOFT 365[®] ENTERPRISE PRODUCTIVITY

Microsoft[®] 365 combines the power of Windows 10, Office 365[®] and Enterprise Mobility + Security (EMS). This subscription service provides scalable cloud services on the Azure cloud platform along with integrated device management and security. Users can access all applications from any location and can also work offline to ensure productivity even without an Internet connection. Organizations have options to choose the subscription plan that best fits their needs.

Microsoft 365 Subscription Plans

Enterprise: Designed for larger organizations requiring enterprise-level data security, with advanced threat protection & analytics, as well as mobility management.

Business: Ideal for small and mid-sized businesses, it provides threat detection, continuous data backup and mobile device management.

Education: Offers bundles designed to meet the unique needs of educational institutions of all sizes.

Enterprise Mobility + Security

EMS is an intelligent mobility management and security platform that helps protect and secure your organization and empowers your employees to work in new and flexible ways. Its powerful features include:

Identity and Access Management: Increase your security posture with a single identity solution that ensures secure connections between people, devices, applications and data

Data Protection: Protect sensitive data with visibility and control over how data is being used and shared

Security Management: Gain visibility into cloud applications and services with sophisticated analytics and control how your data moves

Advanced Compliance: Assess your compliance risks with simplified intelligent assessment tools

Office 365 Enterprise Productivity

Microsoft Office 365 simplifies IT management, while raising the bar on enterprise productivity. Backed by powerful security features and performance reliability, Office 365 combines familiar Microsoft productivity, collaboration, and communication tools to support workers virtually wherever they are, on almost any device.

Enterprise-class Security

Office 365 runs on a global network of data centers, well-protected by multiple layers of security and a strict privacy policy. Microsoft security practices take a risk-based, multi-dimensional approach to safeguard data and services, defining security requirements and implementing corresponding controls.

24/7 Reliability

To protect the reliability of your cloud services, Microsoft automatically stores data in geographically remote data centers. In addition, Microsoft offers a financially-backed Service Level Agreement that guarantees 99.9 % uptime.

Next-gen Productivity

Office 365 services unite cloud-based services with the productivity tools people use every day. In addition to Microsoft Office, users have access to Microsoft Exchange Online, Microsoft SharePoint[®] Online, Microsoft Teams, and Microsoft OneDrive for Business.

Access Anywhere

Email, documents, contacts, and calendars are readily available on virtually any device - laptop, smartphone and most major web browsers.

Office 365 Key Benefits

Access Anywhere

- Secure, single-sign-on access to email, documents, people, and meetings without VPN
